WC COMPLETE

Bring your next workers' comp product to market **fast.**

WC Complete brings operations and technology together across the full policy lifecycle. One trusted partner delivers the technology, services, implementation, integration, and reporting you need with flexible options built around your business.

One partner. Multiple options. Every stage of the policy lifecycle.

MGAs | Carriers | Fronting carriers | PEOs | Program administrators

WC Complete

WC Complete is ReSource Pro's single-partner solution uniting platform, technology, managed services, and premium audit to run every stage of the WC policy lifecycle. Each step wraps in the BPM/APM expertise that ReSource Pro is known for.

Regulatory policy operations

Multi-state rate/rule/form filings; automated statistical and policy reporting to NCCI and independent state bureaus (WCPOLS/WCSTAT); and full audit-trail documentation.

Premium audit & loss control

Premium audit payroll and class code verification, along with loss control surveys that identify or mitigate workplace hazards.

Underwriting guidelines/rating

Premium billing, invoicing, payment processing and collections, month-end reconciliation and reporting, legacy system transition, and commission management. Financial reporting to NCCI & Independent Bureaus.

Data management, migration & integration

End-to-end policy administration, quote, policy issuance, endorsements, COIs, cancellations, reinstatements, renewals, loss runs etc.

System implementation

Core system implementation: vendor-neutral or MIS platform with Managed Services.

Product set-up & filings

Onboarding of new client or program. Including rate, rule and form filings, maintenance configuration and customization, all set up before quoting begins.

Underwriting guidelines/rating

Risk assessment, classification verification, and premium calculation (manual rate, mod, schedule credit, discount, loadings), run through an underwriter workbench with automated approval/rejection workflow rules.

Data management, migration & integration

Policy data intake and validation, plus system integrations and data exchange, that underpin every downstream function. Services for migrating legacy system data, along with the management of historical and current policy data for reporting purposes.
